

Getting Your Books Onto Your Kindle Device/App

There are two options for loading our ebooks to your Kindle device from your PC:

1. **USB Connection.** Plug your Kindle into the USB slot (small rectangular slot) of your computer using the cable that came with your Kindle (the Kindle Fire doesn't come standard with the USB cable, so you'll need to obtain the cable separately, or, use the email option described in #2 below). When you attach your Kindle to your computer via the USB cable, it makes your Kindle appear as a hard drive on your computer. Find the book you wish to read on our site, click the link to download the "Kindle" .MOBI format. Next, navigate to where you see the Kindle show up as a hard drive on your computer. Next, just "drag and drop" the book's file (it should end in file name of .mobi) to the Kindle's "documents" folder. Then disconnect the Kindle from your computer and the book will be ready to read. If you already downloaded the .MOBI file to your computer, here's a helpful YouTube video that shows how to drag the file from your desktop to the Kindle's documents folder: <http://www.youtube.com/watch?v=7UPOgXDYj3M> (video is by a third party not associated with this website).
2. **Email the Ebook to Your Kindle Email Address:** If you don't use the USB method above, for both first generation Kindles and the newest Kindle Fire, you can email the .mobi book files to your Kindle email address. Amazon's support page provides complete details here: <http://www.amazon.com/gp/help/customer/display.html?nodeId=200140600>.

How do I download books to my Kindle from my Mac?

First, go to your web browser's Preferences and click Downloads. Make sure to click on the box that directs your browser to ask you where you want to save downloads. If you don't do this first step, your files may go to your Downloads folder, and then it will be difficult to move them to your Kindle. Next, connect your Kindle to your Mac using the USB cable that came with your Kindle. Next, find the book you wish to download on our site. Then click the link to download the .MOBI file. When your browser asks where you want to save the file, navigate to your Kindle's "Documents" folder, and drop the file there. After a few seconds, unplug your Kindle's USB cable and you're ready to read.

How do I get my book onto the Kindle app on my computer?

Find the book you wish to read on our site, click the link to download the "Kindle" .MOBI format. Next, open the documents folder on your computer. Find the folder for your Kindle content (usually named "My Kindle Content" or something similar) and open it. Next, just "drag and drop" the book's file (it should end in file name of .mobi) to the Kindle content folder.

How do I add an ebook to my Kindle App on Android?

Download the .mobi version of your ebook to your computer (remember where you put it). Plug your Android device via USB into your computer. On your Android device set it to 'USB storage'

this may be a pop up query, but you may have to activate it from your device settings. Navigate from your computer to the /kindle folder on your Android device (it should display as an additional hard drive in your computer's file manager) and copy the .mobi file to the /kindle folder. Eject or dismount your phone safely from the computer before disconnecting the cable. And don't forget to uncheck the 'USB storage' button on your Android device.

If you've tried to download a MOBI book to your Kindle device/app with the instructions above, but it's not showing in your device/app, first make sure you're placing the file into the appropriate folder on the device or app. Also, in some situations, if you power down the Kindle and restart it, the file transfer will work.
