

Getting Your Books Onto Your iPhone/iPad

Go to the Apple App store and download the free iBooks app. Once installed, use the Safari browser from your device to navigate to our website and to the page where the book download links are (the “Free Books” page or the “Books for Sale” page if downloading a free review copy). Next, select the book you want to read and click to download the .epub file. Your iOS (Apple) device will give you the option to open the book in the iBooks app. Voila! Alternatively, you can also try the free BlueFire reader, also in the App store. If you have other favorite e-reading apps installed, it may also give you the option to open the books in your other e-reading apps as well.
